

## Kaba evolo – explore the new access system!

Kaba evolo is the consequent further development in flexibility and future security. The wireless connection and scalability of various components of Kaba evolo is remarkable. It is not only possible to expand mechanical key systems without any problems, seamless migration into superior online access systems is also possible at any time. Kaba evolo is the ideal choice for flexibly harmonized, intelligent access systems.

**KABA**<sup>®</sup>

### Kaba digital cylinder

The completely redesigned Kaba digital cylinder is characterized by a high value new look, innovative feel, compactness, plus both visual and acoustic access signals. Energy-efficient electronics detect the RFID access media, check the authorization and allow doors to be opened. The modular construction eases installation. The „standard“, „dual“, and „half“ versions offer the best solution for every door. The "anti-panic" version for panic doors will be available in 2011.

### Kaba c-lever

Tested and proven, c-lever electronic door furniture is inconspicuous in its classical design and is user friendly. Kaba c-lever ist compatible with practically all standardised commercial mortise door locks. In most cases, there is no need for a door lock change.

### Kaba c-lever compact

Innovation and a new high class design in one. Doing away with the fixed connection between door handle and lock cylinder, enables quick installation with just two screws like mechanical door locks. The independence from the lock cylinder enables a multitude of applications, e.g. on glass doors and wooden doors with a backset as small as 45mm.

## Kaba evolo – explore the new access system!

### Kaba reader

The high-gloss Kaba reader operates locking components, such as door openers, motor locks, barriers and automatic doors. It fits in any standard flush-mounted socket and is available in two versions.

Remote reader, e.g. for outside use

Compact reader for organizational applications, e.g. inside

### Kaba terminal

The Kaba update terminal is the elegant solution refreshing or changing access privileges. Employees can pick up their access privileges at any time, for example in the lobby. New access privileges are assigned in a time saving and efficient manner.

### KEM management software

Kaba evolo manager software (KEM) manages users, media, door components. Access privileges are granted intuitively with this program. The audit trail provides all entry and system incidents at glance.

### Kaba desktop reader

New access media are conveniently programmed with the elegant desktop reader in connection with KEM-Software. Simply connect the USB desktop reader to the PC and get started.

## Kaba evolo – explore the new access system!

### Kaba programming device

The Kaba programming device communicates wireless with standalone door components assures rapid data exchange. Programming the wide range of time functions is facilitated by using the programming device and KEM software.

### Programming media

Kaba evolo programming badges are used for manual programming. A new badge can be programmed into an existing access system without any additional programming equipment.

### User media

Access media are based on Kaba's specially secured RFID chip technology and provide safe and controlled access.

### Security Cards

The security cards enable registration of the unique code of the master key system as well as the user media configurations into the software.
