oval profile as well as with insert

Suitable for medium to large master key systems

Safe against manipulation, impressing, bumping, drilling,
tearing off and vandalism

Areas of Applications:

Private homes
Apartment buildings
Business and small industrial
sites
Schools, offices
Medical practices

Advantages:

Security – Kaba master key systems fulfill a high security
standard thanks to radially arranged tumbler pin rows, best
materials, exact precision milling and unique cylinder
construction

High copy protection thanks to the security card as well as
computer controlled milling process and key blank
protection

Investment security – the master key system can be
expanded at any time and can be integrated into electronic
locking systems

Convenience – the reversible key can be inserted into the
lock cylinder in any position and requires little maintenance
Organization – the customer determines in the master key
system which key opens which door(s)

12 key different key clip colors for easy recognition

Modular – thanks to their modular construction, the cylinder
cores (inserts) can be used in other types of cylinders, such
as single cylinders, thumbturn cylinders, cam locks, etc.
